

Turn Logistics Relationships Into *Long-Term Recurring* Income

UnieLogics' Account Executive program for brokers, consultants, auditors, and industry professionals who can open doors in warehousing, freight, ecommerce, and supply chain operations.

AUDIT-LED SELLING • RECURRING AE ECONOMICS

This program turns industry access into a *protected revenue channel*.

The Account Executive does not simply refer a name. The AE uses operational audits to create urgency, matches the account to the right technology, and earns from active accounts under the Account Executive agreement.

RELATIONSHIP

Account Executives bring access to warehouses, freight operators, sellers, and logistics decision-makers.

AUDIT

The audit exposes gaps in billing, freight, WMS, OMS, inventory, retention, and operations.

REVENUE ASSET

Closed accounts can produce first-year commissions and recurring income across multiple product lines.

The industry is full of operational problems most operators *cannot see clearly*.

WAREHOUSES

Manual workflows, disconnected billing, weak visibility, labor waste, and limited client control.

FREIGHT

Inefficient LTL/FTL decisions, poor consolidation, carrier friction, and margin leakage.

SELLERS

Limited OMS control, weak replenishment intelligence, support issues, and fulfillment blind spots.

ADVISORS

They identify the pain, but rarely own the software that fixes it or the recurring economics.

The people closest to the problem *should own the upside.*

Industry professionals already have access, trust, and context. The missing piece is a credible audit engine, enterprise platform, and aggressive compensation model.

ACCOUNT EXECUTIVE ADVANTAGE

Access

Relationships become revenue assets.

Use the audit to create the business case, then position the right product line as the operational solution.

Lead with the audit. *Close with the platform.*

The audit changes the conversation from "look at our software" to "here are the operational problems we found and the system that fixes them."

1

Audit

Inspect operations and data.

2

Diagnose

Expose cost, control, and workflow issues.

3

Present Gap

Make the problem visible to decision-makers.

4

Sell Solution

Match WMS, freight, APIs, or OMS.

5

Find the problem *before you sell the fix.*

The audit creates urgency. The software creates the solution. The Account Executive earns from the account.

- Billing leakage and invoice discrepancies
- Freight inefficiencies and consolidation gaps
- WMS, OMS, inventory, and workflow gaps
- Client retention, support, and automation opportunities

OPERATIONAL AUDIT SNAPSHOT

SAMPLE OUTPUT

\$42K

ESTIMATED LEAKAGE

18%

FREIGHT WASTE

One Account Executive program.

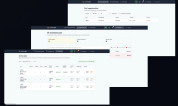

Multiple ways to monetize the relationship.

WMS

UnieWMS

Warehouse management, billing, inventory, tasks, clients, and operational control.

FREIGHT

LTL / FTL Technology

Freight workflows, routing support, carrier coordination, and consumption-based logistics technology.

API

Cortex APIs

Audit intelligence, recommendations, automation, optimization, and decision support.

OMS

UnieConnect

OMS, marketplace connectivity, seller visibility, fulfillment coordination, and account intelligence.

Compensation designed
to build a serious book of business.

The schedule rewards Account Executives for opening doors, using the audit process, and helping activate accounts that stay with the platform.

UnieWMS	90%	FIRST-YEAR COMMISSION
UnieWMS Renewals	30%	EVERY YEAR AFTER
LTL / FTL Technology	10%	ELIGIBLE USAGE EARNINGS
Cortex APIs	30%	ONGOING COMMISSION
UnieConnect	30%	ONGOING COMMISSION

Based on eligible collected revenue and final Account Executive terms.

The WMS offer creates the *strongest upfront Account Executive incentive.*

FIRST YEAR

90%

Commission on eligible first-year UnieWMS revenue.

RENEWALS

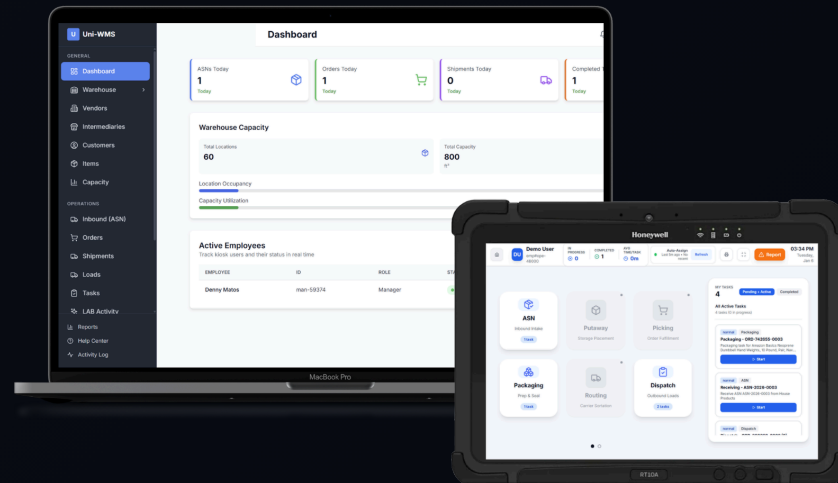

30%

Ongoing annual commission after the first year while the account remains active and eligible.

PROGRAM LOGIC

Audit

Use audit findings to create the business case for WMS adoption.

Serious Account Executives need a *serious account-registration structure.*

The program should protect legitimate AE-sourced opportunities while giving UnieLogics clean rules for qualification, activation, payout, and support.

Account Registration

Account Executive submits the target account before sales activity is credited.

Protection Window

Registered accounts receive a defined protection window under the Account Executive agreement.

Expansion Credit

If the account expands into additional eligible products, Account Executive economics can follow the registered relationship.

Active Account Rule

Ongoing commissions require active accounts, collected revenue, and compliance with program terms.

No Channel Conflict

Duplicate submissions, existing pipeline accounts, and house accounts are resolved by written program rules.

Deal Support

UnieLogics supports audits, demos, proposals, implementation planning, and product matching.

A simple motion that converts access *into a software-backed opportunity.*

1**Identify**

Warehouses, sellers, freight users, distributors, manufacturers, and logistics operators.

2**Register**

Submit account for Account Executive protection and deal tracking.

3**Audit**

Use operational audit tools to expose gaps and quantify the pain.

4**Present**

Review findings with decision-makers and match the product line.

5**Close**

UnieLogics supports demo, proposal, onboarding, and implementation.

6**Earn**

Account Executive receives eligible commission on collected revenue under agreement terms.

Built for industry professionals who can
open doors and explain operational pain.

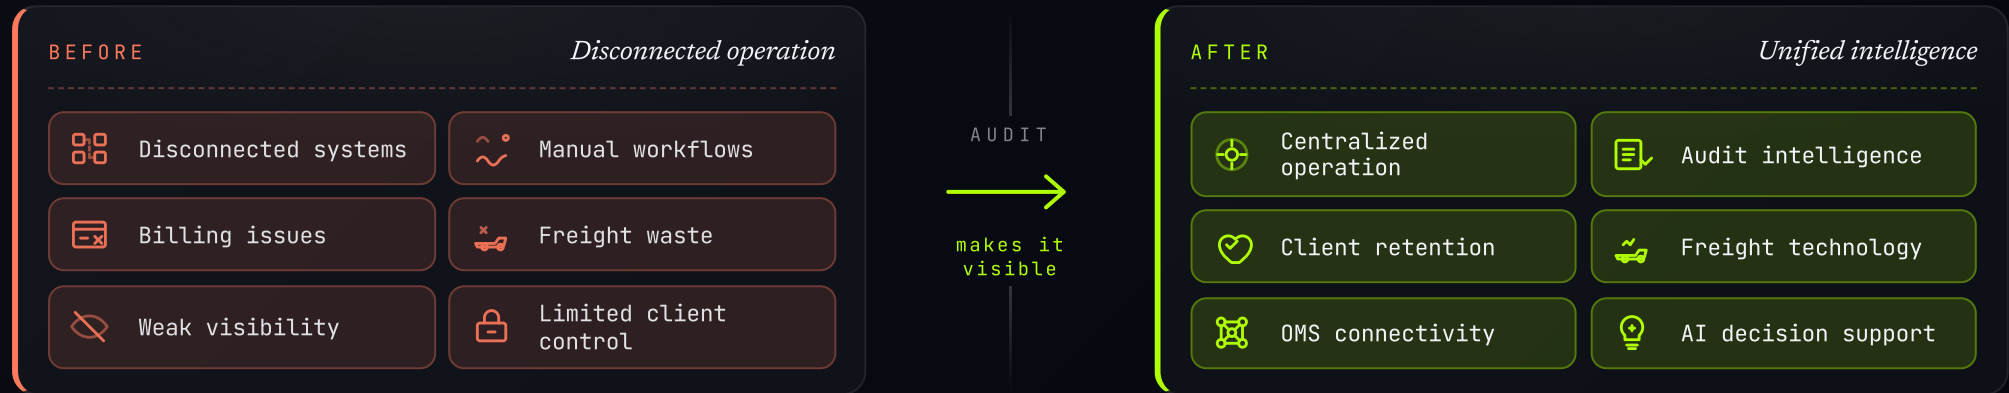

Ideal Account Executives

- Freight brokers
- 3PL consultants
- Warehouse advisors
- Ecommerce consultants
- Supply chain auditors
- WMS/OMS implementers
- Carrier relationship managers
- Marketplace consultants

Target Accounts

- Warehouses and 3PLs
- Ecommerce sellers and brands
- Distributors and wholesalers
- Manufacturers with LTL/FTL needs
- Marketplace operators
- Freight-heavy operators
- Multi-warehouse accounts
- Businesses with manual billing or inventory issues

The customer buys because the audit *makes the problem visible.*

Account Executives need more than commission.

They need a repeatable system.

Audit Positioning

Talk tracks and audit categories that help Account Executives identify pain quickly.

Sales Materials

Corporate decks, one-pagers, compensation overview, email sequences, and call scripts.

Deal Desk

Support for demo strategy, pricing, proposal structure, and product matching.

Implementation Handoff

Clear process after close so the customer sees professionalism from day one.

AE Dashboard

Account registration, deal status, commission visibility, and product education.

Training

Product, audit, objection-handling, and vertical-specific selling resources.

Make the upside bold, *but keep the program terms clean.*

This deck should recruit serious Account Executives while staying clear about eligibility, timing, final agreement terms, and the fact that no income outcome is guaranteed.

Eligible Revenue

Define which collected revenue categories are commissionable.

Payment Timing

Commissions paid after customer payment clears and account status is verified.

Chargebacks / Refunds

Returned or unpaid revenue can adjust commission calculations.

Account Executive Conduct

No false claims, no savings guarantees, no unauthorized pricing promises.

Customer Ownership

Account registration rules determine credit, conflict handling, and expansion economics.

Final Agreement Controls

Account Executive agreement overrides all marketing language and program summaries.

Every account can become *a long-term revenue asset.*

Account Executives bring access, trust, and industry knowledge. The platform brings the audit tools, software, implementation structure, and compensation model.
